

Authentication with NextJS

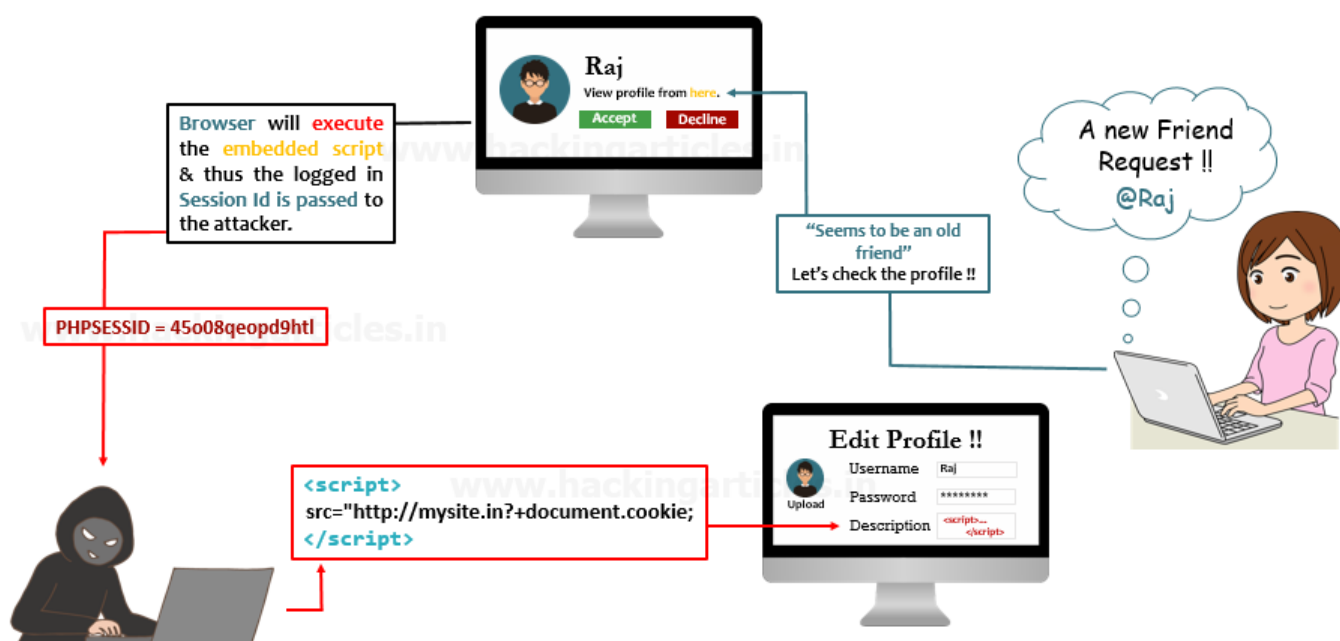

Source: <https://dev.to/caffiendkitten/authentication-vs-authorization-25lc>

AGENDA

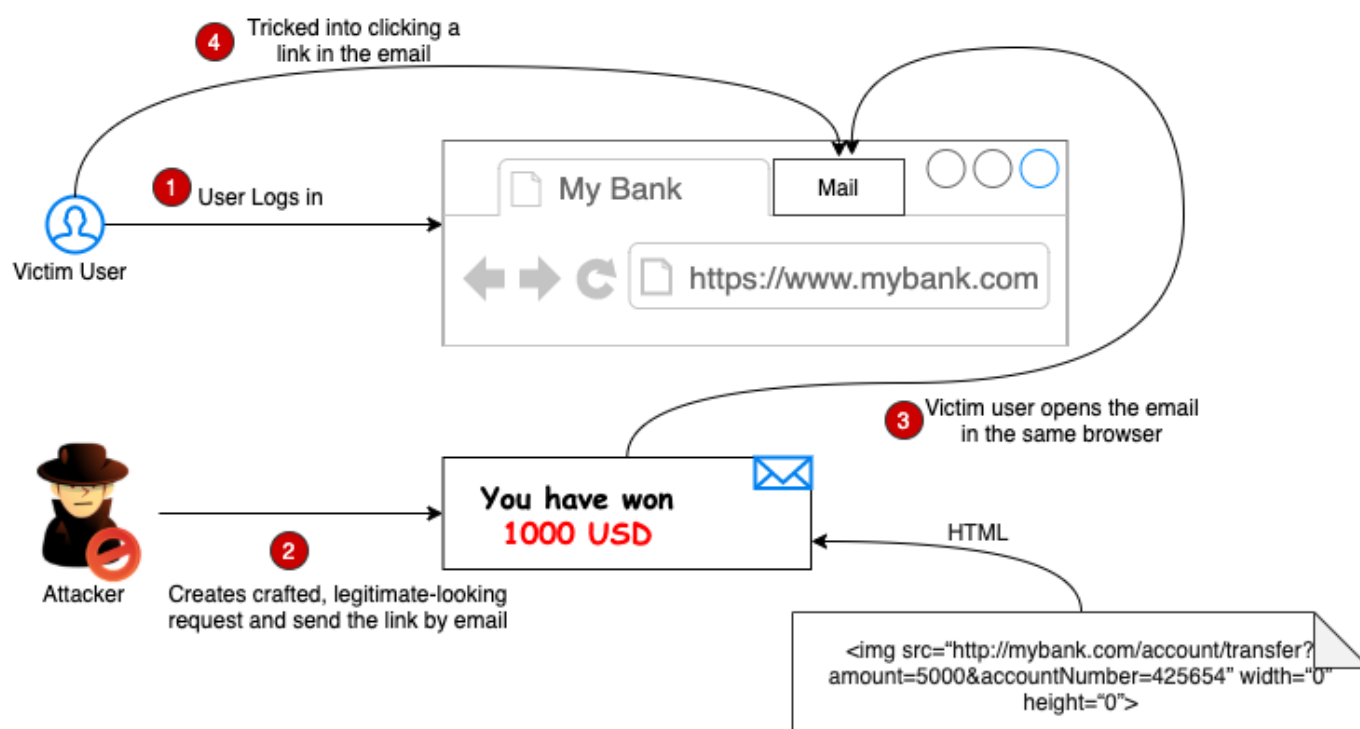

1. Auth: cookies or localStorage
 2. Our solution
-

1. Auth: cookies or localStorage

- Local Storage --> XSS attack
- Cookies --> CSRF attack

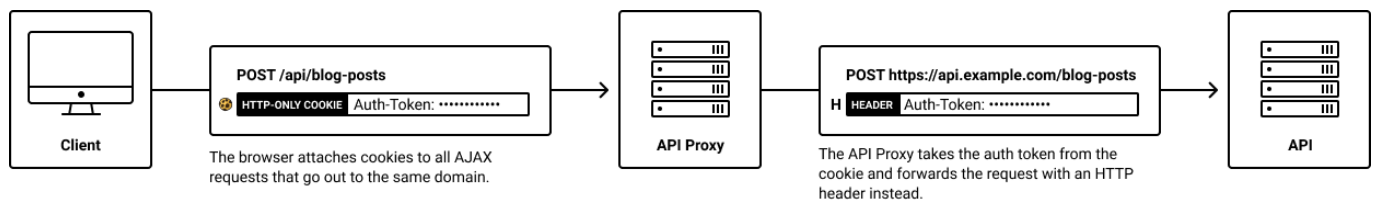

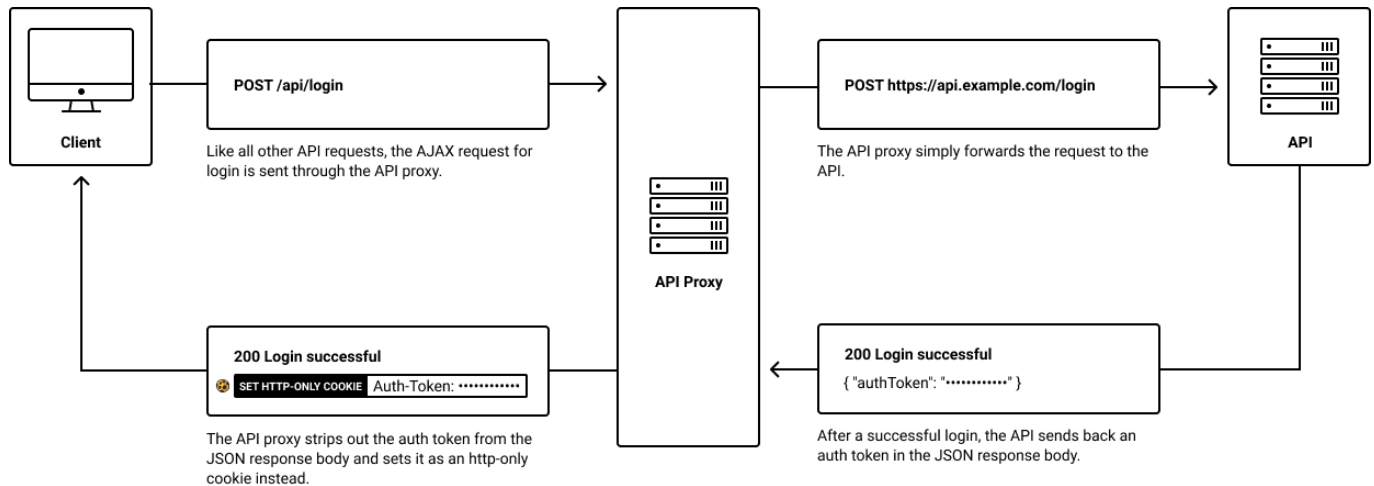

Source: <https://laptrinhx.com/comprehensive-guide-on-cross-site-scripting-xss-4212903614/>

Source: <https://reflectoring.io/complete-guide-to-csrf/>

2. Our solution with NextJS

- Use NextJS as a **proxy server** to hide our "API Server" from user's network.
- **Use cookies with httpOnly** so it can't be retrieved by client's javascript
- Automatically send cookies to NextJS server.
