## **CSR - Client Side Rendering**

#### **AGENDA**

- 1. dynamic ssr=false
- 2. SSG + Data fetching on client side

## 1. dynamic ssr=false

You may not always want to include a module on server-side. For example, when the module includes a library that only works in the browser.

## 2. SSG + Data fetching on client side

# Static Generation without Data + Fetch Data on the Client-Side

You can also pre-render without data and then load the data on the client-side.

Statically generate parts of the page that do not require external data

Populate the remaining parts using external data
